

(was produced) is preceded by ten days,⁵ and followed by ten such days, and is in the midst (of both periods). On both sides it is thus put in a Virât (the number ten). Being thus put in a Virât (in the number ten) on both sides, this (Ekaviṃś'a, i. e. the sun) becomes not disturbed in his course through these worlds.

The gods being afraid of the sun falling from the sky, supported him by placing beneath three celestial worlds to serve as a prop. The (three) Stomas⁶ (used at the three Svarasâman days which precede the Vishuvan day) are the three celestial worlds. They were afraid, lest he (the sun) should fall beyond them. They then placed over him three worlds (also) in order to give him a prop from above. The (three) Stomas (used at the three Svarasâman days which follow the Vishuvan day) are the three worlds. Thus there are before (the Vishuvan day) three seventeen-fold Stomas (one on each of the preceding Svarasâman days), and after it (also) three seventeen-fold Stomas. In the midst of them there is the Ekaviṃś'a day (representing the sun) held on both sides by the Svarasâman days. On account of his being held by the three Svarasâmans (representing the three worlds below and the three above the sun) the sun is not disturbed in his course through these worlds.

The gods being afraid of the sun falling down from the sky, supported him by placing beneath the highest worlds. The Stomas are the highest worlds.

The gods being afraid of his falling beyond them being turned upside down, supported him by

⁵ The ten days which precede the Ekaviṃś'a are, the three *Svarasâmanah*, *Abhijit*, and a *Shalaha* (a period of six days). The same days follow, but so, that Svarasâmanah, which were the last three days before the Ekaviṃś'a, are the first three days after that day, &c.

⁶ On Stomas, see the note to 3, 42.
